Child Protective Services Diane DePanfilis 2003 From the Preface: This manual, Child Protective Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community’s child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout in this manual. With 19 practical steps, this manual is intended for CPS workers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Writing: A User Manual David Hewson 2012-02-16 You are a writer and you have a killer book idea. When your project starts to take off you will find yourself managing a writhing tangle of ideas, possibilities and potential potholes. How do you turn your inspiration into a finished novel? Writing a User’s Manual offers practical insight into the processes that go into writing a novel, from planning to story development, research to revision and, finally, delivery in a form which will catch the eye of an agent or publisher. David Hewson, a highly productive and successful writer of popular fiction with more than sixteen novels in print in twenty or so languages, shows how to manage the day to day process of writing. Writers will learn how to get the best out of software and novel writing packages such as Scrivener, which help you view your novel not as one piece of text, but as individual linked scenes, each with their own statistics, notes and place within the novel structure. As you write, you will need to assemble the main building blocks to underpin your artistry: story structure; genre - and how that affects what you write; point of view; past, present or future tense; software for keeping a book journal to manage your ideas, research and outlining; organization and more. The advice contained in this book could mean the difference between finishing your present or future tense; software for keeping a book journal to manage your ideas, research and outlining; place within the novel structure. Marriage, Manners and Mobility in Early Modern Venice Alexander Cowan 2016-05-13 Throughout history, marriage has been used as a method of creating and strengthening bonds between elites and the societies over which they ruled. Nowhere is this more apparent than in early modern Venice, where members of the patriciate looked to marital alliances with outsider brides to help maintain their position and social distinction in a fluid society. This book explores the parameters of upward social mobility, contemporary evaluations of social status and moral behaviour, and the place of marriage and concubination within patrician society. Drawing heavily on the records of the Avogaria di Comun, which had the task of examining the social backgrounds and moral reputations of women from outside the patriciate who wished to marry patricians, this study provides a fascinating reconstruction of Venetian society as it was seen by individuals at every level.

The City and the Senses Dr Alexander Cowan 2013-06-28 How do we experience a city in terms of the senses? What are the inter-relations between human experience and behaviour in urban space? This volume examines these questions in the context of European urban culture between the fifteenth and twentieth centuries, exploring the institutions and ideologies relating to the range of sensual experience and its interpretation. Spanning pre-industrial and modern cities in Britain, France, Germany and the United States, it enables the reader to establish major contrasts and continuities in what is still an evolving urban experience. Divided into sections corresponding to the five senses: noise, vision, taste, touch and smell, each section allows for comparisons which act as reminders that the experience of the city was a multi-sensual one, and that these experiences were as much intellectual as physical in their nature.
