Advising Fiscal Etats de Compatibilité au développement actuel 

Administrateur Cameroun Pf 

William F. H. Smith and Robert Pf. 2019-01-01 The report builds on a number of recent tax reforms that have contributed to the country’s impressive macroeconomic stability and strong growth prospects. It assesses the main challenges facing the tax system and how they should be addressed to support the goal of reducing income inequality and poverty. The report argues that the tax system should be designed to be progressive, transparent, and efficient, and that it should also be adapted to the country’s changing economic landscape. The report provides a detailed analysis of the tax code, including its structure and its main provisions, and it identifies a number of specific recommendations for improving the tax system. The report also provides a number of recommendations for improving the tax administration, including the need for better data and analytical tools, as well as the need for stronger institutional capacity. The report concludes by highlighting the importance of implementing the tax reform recommendations and the need for sustained commitment from the government and stakeholders to ensure their successful implementation.
