The Divine Farmers Materia Medica A Translation Of The Shen Nong Ben Cao Jing Pdf

As recognized, adventure as well as experience roughly lesson, amusement, as competently as union can be gotten by just checking out a ebook the divine farmers materia medica a translation of the shen nong ben cao jing pdf plus it is not directly done, you could recognize even more in the region of this life, in relation to the world.

We provide you this proper as without difficulty as easy exaggeration to get those all. We allow the divine farmers materia medica a translation of the shen nong ben cao jing pdf and numerous book collections from fictions to scientific research in any way. in the middle of them is this the divine farmers materia medica a translation of the shen nong ben cao jing pdf that can be your partner.

Compendium of Materia Medica 2003
Shén Nóng Běncǎo Jīng: The Divine Farmer's Classic of Materia Medica 3rd Edition Sabine Wilms 2017-01-21 This book is a literal translation of one of the earliest and most important classics of Chinese medicine and natural science: the Shén Nóng B'nc'o J'ng ? or "Divine Farmer's Classic of Materia Medica." Compiled in the third century CE but undoubtedly much older in content, it contains information on 365 substances that were considered to have beneficial effects on the human body.

Traditional Herbal Medicine Research Methods Willow J.H. Liu 2011-03-29 This book introduces the methodology for collection and identification of herbal materials, extraction and isolation of compounds from herbs, in vitro bioassay, in vivo animal test, toxicology, and clinical trials of herbal research. To fully understand and make the best use of herbal medicines requires the close combination of chemistry, biochemistry, biology, pharmacology, and clinical science. Although there are many books about traditional medicines research, they mostly focus on either chemical or pharmacological study results of certain plants. This book, however, covers the systematic study and analysis of herbal medicines in general – including chemical isolation and identification, bioassay and mechanism study, pharmacological experiment, and quality control of the raw plant material and end products.

The Yellow Emperor's Classic of Medicine Maoshing Ni 1995-05-10 The Neijing is one of the most important classics of Taoism, as well as the highest authority on traditional Chinese medicine. Its authorship is attributed to the great Huang Di, the Yellow Emperor, who reigned during the third millennium BCE. This new translation consists of the eighty-one chapters of the section of the Neijing known as the Suwen, or "Questions
of Organic and Fundamental Nature." (The other section, called the Lingshu, is a technical book on acupuncture and is not included here.) Written in the form of a discourse between Huang Di and his ministers, The Yellow Emperor's Classic of Medicine contains a wealth of knowledge, including etiology, physiology, diagnosis, therapy, and prevention of disease, as well as in-depth investigation of such diverse subjects as ethics, psychology, and cosmology. All of these subjects are discussed in a holistic context that says life is not fragmented, as in the model provided by modern science, but rather that all the pieces make up an interconnected whole. By revealing the natural laws of this holistic universe, the book offers much practical advice on how to promote a long, happy, and healthy life. The original text of the Neijing presents broad concepts and is often brief with details. The translator's elucidations and interpretations, incorporated into the translation, help not only to clarify the meaning of the text but also to make it a highly readable narrative for students—as well as for everyone curious about the underlying principles of Chinese medicine.

**The Classic of Difficulties** Bianque 1999

**Ancient Post-Flood History** Ken Johnson 2010-01-01 This book is a Christian timeline of ancient post-Flood history based on Bible chronology, the early church fathers, and ancient Jewish and secular history. This can be used as a companion guide in the study of Creation science. This revised edition adds the background history of nine new countries. Learn the true origins of the countries and people of France, Germany, Denmark, Sweden, Ireland, Scotland, Greece, Italy, Russia, Egypt, Israel, Iraq, Iran, China, the Arabs, the Kurds, and more. Some questions answered: Who were the Pharaohs in the times of Joseph and Moses? When did the famine of Joseph occur? What Egyptian documents mention these? When did the Exodus take place? When did the kings of Egypt start being called "Pharaoh" and why? Who was the first king of a united Italy? Who was Zeus and where was he buried? Where did Shem and Ham rule and where were they buried? How large was Nimrod's invasion force that set up the Babylonian Empire, and when did this invasion occur? What is Nimrod's name in Persian documents? How can we use this information to witness to unbelievers? Brought to you by Biblefacts Ministries, Biblefacts.org

**Huang Di Nei Jing Su Wen** Paul U. Unschuld 2011-07-28 A foundation of Chinese life sciences and medicine, the Huang Di Nei Jing Su Wen is now available for the first time in a complete, fully annotated English translation. Also known as Su Wen, or The Yellow Emperor’s Inner Classic, this influential work came into being over a long period reaching from the 2nd century bce to the 8th century ce. Combining the views of different schools, it relies exclusively on natural law as conceptualized in yin/yang and Five Agents doctrines to define health and disease, and repeatedly emphasizes personal responsibility for the length and quality of one’s life. This two-volume edition includes excerpts from all the major commentaries on the Su Wen, and extensive annotation drawn from hundreds of monographs and articles by Chinese and Japanese authors produced over the past 1600 years and into the twentieth century.

**Animals Through Chinese History** Roel Sterckx 2019 This innovative collection opens a door into the rich history of animals in China. This title is also available as Open Access.

**Fu Qing-zhu's Gynecology** Shan Fu 1992
The Divine Farmer's Materia Medica  Shouzhong Yang 1998
The Modern Herbal Dispensatory  Thomas Easley 2016-11-29

The definitive, full-color guide to making and using approximately 250 herbal medicines at home, with instructions for everything from harvesting to administering low-cost, DIY remedies. This comprehensive, full-color guide provides detailed, easy-to-follow instructions for making and using approximately 250 herbal medicines at home, including practical tips and numerous effective formulas developed and tested by the authors, both expert herbalists with years of experience. Readers who appreciate the health-giving properties of herbal medicines but are discouraged by the high price of commercial products can now make their own preparations for a fraction of the cost. The authors tell you everything you need to know about harvesting, preparing, and administering herbs in many different forms, including fresh, bulk dried herbs, capsules, extracts in water, alcohol, glycerin, vinegar and oil, and even preparations like essential oils and flower essences. The book also covers topical applications of herbs as salves, lotions, poultices, tooth powders, ear drops, and more, and includes an extensive chapter on herbal hydrotherapy. The Modern Herbal Dispensary explains why different preparations of the same herb will obtain better results, demonstrating how capsules, teas, tinctures, or glycerites of the same plant will not have exactly the same effect on the body. Leading herbalists Thomas Easley and Steven Horne have tested and proven the herbal formulas they offer, along with suggestions for treating more than one hundred illnesses. They lay out the principles of herbal formulation and also provide instructions on how to prepare single herbs, a procedure that has been largely ignored in other references. More comprehensive than any other guide, thoroughly researched, beautifully illustrated, and presented with ease of use in mind, this book will take its place as the premier reference for those who want to produce all the herbal remedies they need, and to save money in the process.

A Rainbow of TAO  2018-10-11

What treasures does this Tao from the Far East bring to our Western culture? In this beautiful and accessible book, the author replies by telling her experience with Tao through her words and her color photographs of nature, accompanied by selections from Tao Te Ching and Chuang Tsu. Readers can experience what is awakened in themselves by these words and images. Each of us must find Tao in our own unique way. In the early 1970s Jane English and her husband, Gia-fu Fung, illustrated their best-selling editions of these classics with his Chinese calligraphy and her black-and-white photographs of nature. In this new book, Jane has ventured into another dimension of expression, the full color spectrum. This is just as nature intended for our eyes to see; it allows our spirits to soar.- Chungliang Al Huang

The Herbal Apothecary  JJ Pursell 2016-01-27

A comprehensive and practical reference to using medicinal herbs for natural healing from JJ Pursell, the founder of The Herb Shoppe and one of the leading names in the fields of herbalism and naturopathy. Democracy and Education  John Dewey 1916

John Dewey's Democracy and Education addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in education and for the necessity of universal education.
for the advancement of self and society. First published in 1916, Democracy and Education is regarded as the seminal work on public education by one of the most important scholars of the century. *Anecdotes of Traditional Chinese Medicine* Qu Lifang 2018-04-09 This bilingual book contains a selection of Chinese medicine anecdotes drawn from China's enormous textual archive. The sections form collections of alternative names for: Each story begins with the Chinese characters, accompanied by the pin yin with tones to guide Western students with their Chinese pronunciation. Then the English version of the story follows with a glossary to assist Chinese students with their English pronunciation.

**Shang Han Lun** Zhongjing Zhang 1999 The Shang Han Lun (On Cold Damage) is among the oldest surviving, the most copiously annotated and the most revered of China's traditional medical texts. Of all of China's early medical classics, the Shang Han Lun is undoubtedly the one with the greatest relevance to the modern practice of Chinese medicine, and the one most deserving of Western attention. It was the first book to attempt to incorporate medicinal therapy into the medicine of systematic correspondences and channels and network vessels. Far ahead of its time in both theory and practice, it is not surprising that the prescriptions it contains comprise an important part of today's medicinal formulary.

**Introduction to Bioregulatory Medicine** Alta Smit 2011-01-01 Written by international experts in the field, this book provides a comprehensive introduction to the fundamental principles and clinical practice of bioregulatory medicine. It opens with an overview of core concepts in homotoxicology, including the human body's defense and regulation systems, followed by a chapter on the development and evolution of illness. The authors cover the different preparation groups and discuss in detail the basic principles of antihomotoxic therapy: drainage and detoxification, immunomodulation, and cell and organ support. The final chapter focuses on the practical aspects of bioregulatory treatment, including the selection and availability of medications, indications, contraindications, and therapeutic strategies for a variety of common diseases. Highlights: Insights from renowned experts in homotoxicology Poster-size version of the Disease Evolution Table (DET), a key tool in daily practice Plant-, mineral-, and organ-based medications—how they work Practical information on various treatment methods, such as ointment dressings, injection therapies, and biopuncture 80 high-quality illustrations and diagrams that demonstrate key concepts

**Celestial Secrets** Sabine Wilms 2021-01-13 This book is the first English translation of a rare medieval Chinese manuscript with the full title *Fuxing jue zangfou yongyao fuyao* ("Secret Tips for Helpful Action: The Key to Using Medicinals on the Zàngf? Organs"). In addition to an elegant yet literal annotated translation of the complete text by Dr. Sabine Wilms, this book includes a lengthy scholarly introduction, analyzing the history of the text and its relationship to an ancient mythological *T?ngyèj?ng* ("Classic of Decoctions"), with which it is sometimes wrongly identified. The eminent j?ngf?ng practitioner Sharon Weizenbaum has kindly contributed a
foreword and clinical commentary.

An Illustrated Chinese Materia Medica Jing-Nuan Wu 2005-04-28 One of the cornerstones of traditional Chinese medicine (TCM), herbal medicine has evolved over centuries of clinical practice and empirical results into a vast body of knowledge encompassing more than 6,000 substances, most of whose effects and uses have been documented and researched. The literature on Chinese medicinal herbs is unparalleled and unsurpassed in the world's medical knowledge; the earliest known pharmacological work was composed before the end of the third century B.C. The first classical Chinese materia medica appeared during the late Han dynasty (25-22-A.D.) and included 365 entries of botanical, zoological, and mineral substances, listing their properties and effects. Subsequent materia medica were assembled during virtually every dynasty from the Liang (456-536 A.D.) to the Qing (1645-1911). Among the major treatments published during these centuries was the 30-volume Materia Medica Arranged According to Pattern, which had 1558 entries, more than 3,000 formulae, and became the official pharmacopoeia of herbal medicine in China for 500 years. n Illustrated Chinese Materia Medica brings to the English language a lavishly illustrated atlas of the 320 herbs used most frequently in traditional Chinese medical practice. Each substance is profiled authoritatively in monographs that provide pharmaceutical, botanical and English names; flavor properties and channel tropisms; functions; clinical uses and major combinations; dosage and administration; and precautions. Intended for medicinal and pharmaceutical chemists as well as practitioners of homeopathic and alternative medicines, this materia medica offers a unique blend of authenticity that is derived from knowledge of classical Chinese literature with a clearly practical objective of presenting valuable information in a straightforward, easily comprehensible style.

Channeling the Moon Sabine Wilms 2019-04-23 A literal translation and discussion of a thirteenth-century Chinese textbook on gynecology: Qi Zhongfu's Hundred Questions on Gynecology from 1220 CE. Includes the Chinese original side-by-side with the English, extensive commentary on the essays and formulas, and clinical notes by Sharon Weizenbaum.

Healing with Poisons Yan Liu 2021-06-22 Open access edition: DOI 10.6069/9780295749013 At first glance, medicine and poison might seem to be opposites. But in China’s formative era of pharmacy (200–800 CE), poisons were strategically employed as healing agents to cure everything from abdominal pain to epidemic disease. Healing with Poisons explores the ways physicians, religious figures, court officials, and laypersons used toxic substances to both relieve acute illnesses and enhance life. It illustrates how the Chinese concept of du—a word carrying a core meaning of “potency”—led practitioners to devise a variety of methods to transform dangerous poisons into effective medicines. Recounting scandals and controversies involving poisons from the Era of Division to the Tang, historian Yan Liu considers how the concept of du was central to how the people of medieval China perceived both their bodies and the body politic. He also examines the wide range of toxic minerals, plants, and animal products used in classical Chinese pharmacy, including everything from the herbaconite to the popular recreational drug Five-Stone Powder. By recovering alternative modes of understanding wellness and the body’s interaction with
foreign substances, this study cautions against arbitrary classifications and exemplifies the importance of paying attention to the technical, political, and cultural conditions in which substances become truly meaningful. Healing with Poisons is freely available in an open access edition thanks to TOME (Toward an Open Monograph Ecosystem) and the generous support of the University of Buffalo.

The Web That Has No Weaver Ted J. Kaptchuk 2000-05-02 A Doody’s Core Title for 2019! The Web That Has No Weaver is the classic, comprehensive guide to the theory and practice of Chinese alternative medicine. This accessible and invaluable resource has earned its place as the foremost authority in synthesizing Western and Eastern healing practices. This revised edition is the product of years of further reflection on ancient Chinese sources and active involvement in cutting-edge scientific research.

Chronicles of Pharmacy A. C. Wootton 1910
Authority and Expertise in Ancient Scientific Culture Jason König 2017-01-20 How did ancient scientific and knowledge-ordering writers make their work authoritative? This book answers that question for a wide range of ancient disciplines, from mathematics, medicine, architecture and agriculture, through to law, historiography and philosophy - focusing mainly, but not exclusively, on the literature of the Roman Empire. It draws attention to habits that these different fields had in common, while also showing how individual texts and authors manipulated standard techniques of self-authorisation in distinctive ways. It stresses the importance of competitive and assertive styles of self-presentation, and also examines some of the pressures that pulled in the opposite direction by looking at authors who chose to acknowledge the limitations of their own knowledge or resisted close identification with narrow versions of expert identity. A final chapter by Sir Geoffrey Lloyd offers a comparative account of scientific authority and expertise in ancient Chinese, Indian and Mesopotamian culture.

Kent’s Comparative Repertory of the Homoeopathic Materia Medica 2004-06-30 This book is about practising homoeopathy.

Vernacular Medicine in Colonial India Shinjini Das 2019-03-14 Interrelated histories of colonial medicine, market and family reveal how Western homeopathy was translated and made vernacular in colonial India. Hawai’i Reader in Traditional Chinese Culture Professor of Chinese Language & Literature Victor H Mair 2005 The Hawai’i Reader in Traditional Chinese Culture is a collection of more than ninety primary sources of cultural significance from the Bronze Age to the turn of the twentieth century. Each selection, all but a few of which were translated specifically for this volume, is preceded by a brief introduction that (where pertinent) identifies its author, establishes the context, and raises important issues and questions. Together they take into account virtually every aspect of traditional culture, including sources from the non-Sinitic ethnic minorities. Hawai’i Reader in Traditional Chinese Culture is ideal for undergraduate courses on the history, culture, and society of pre-modern China.

A Chinese Bestiary Richard E. Strassberg 2018-03-05 A Chinese Bestiary presents a fascinating pageant of mythical creatures from a unique and enduring cosmography written in ancient China. The Guideways through Mountains and Seas, compiled between the fourth and first centuries B.C.E., contains descriptions of
hundreds of fantastic denizens of mountains, rivers, islands, and seas, along with minerals, flora, and medicine. The text also represents a wide range of beliefs held by the ancient Chinese. Richard Strassberg brings the Guideways to life for modern readers by weaving together translations from the work itself with information from other texts and recent archaeological finds to create a lavishly illustrated guide to the imaginative world of early China. Unlike the bestiaries of the late medieval period in Europe, the Guideways was not interpreted allegorically; the strange creatures described in it were regarded as actual entities found throughout the landscape. The work was originally used as a sacred geography, as a guidebook for travelers, and as a book of omens. Today, it is regarded as the richest repository of ancient Chinese mythology and shamanistic wisdom. The Guideways may have been illustrated from the start, but the earliest surviving illustrations are woodblock engravings from a rare 1597 edition. Seventy-six of those plates are reproduced here for the first time, and they provide a fine example of the Chinese engraver's art during the late Ming dynasty. This beautiful volume, compiled by a well-known specialist in the field, provides a fascinating window on the thoughts and beliefs of an ancient people, and will delight specialists and general readers alike.

Ancient Mesopotamia

A. Leo Oppenheim 2013-01-31

"This splendid work of scholarship ... sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, New York Times Book Review

Ancient Mesopotamia—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, Book Week

"Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."—Samuel Noah Kramer, Archaeology

A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the Assyrian Dictionary of the Oriental Institute and John A. Wilson Professor of Oriental Studies at the University of Chicago.

Buddhism and Medicine in Japan

Katja Triplett 2019-11-18

This book demonstrates the close link between medicine and Buddhism in early and medieval Japan. It may seem difficult to think of Japanese Buddhism as being linked to the realm of medical practices since religious healing is usually thought to be restricted to prayers for divine intervention. There is a surprising lack of scholarship regarding medicinal practices in Japanese Buddhism although an overwhelming amount of primary sources proves otherwise. A careful re-reading of well-known materials from a study-of-religions perspective,
together with in some cases a first-time exploration of manuscripts and prints, opens new views on an understudied field. The book presents a topical survey and comprises chapters on treating sight-related diseases, women’s health, plant-based materia medica and medicinal gardens, and finally horse medicine to include veterinary knowledge. Terminological problems faced in working on this material – such as ‘religious’ or ‘magical healing’ as opposed to ‘secular medicine’ – are assessed. The book suggests focusing more on the plural nature of the Japanese healing system as encountered in the primary sources and reconsidering the use of categories from the European intellectual tradition.

Master Hua’s Classic of the Central Viscera Tuo Hua 1993
Publication of the first English language translation of this Chinese medical text bearing the name of the most famous Chinese doctor of antiquity, Hua Tuo, gives Western practitioners access to what is, perhaps, the premier proto-Daoist medical classic. In particular, this book is a great source of information on pulse diagnosis and is the locus classicus of the theory of warm supplementation, containing numerous fascinating herbal and alchemical formulas for both internal and external usage.

The Yellow Emperor’s Inner Transmission of Acupuncture Yang Zhenhai 2020-03-03
An indefatigable discoverer and preserver of lost traditions in the field of classical Chinese medicine, Liu Lihong has done it again—The Yellow Emperor’s Inner Transmission of Acupuncture features a passionate and clinically relevant synthesis of his discipleship with Yang Zhenhai, one of the last remaining master practitioners of Daoist acupuncture in mainland China. At the forefront of an international discourse on the definition and clinical significance of classical Chinese medicine, Yang and Liu promote yet another holistic medical system that radically contrasts the current penchant for symptom-oriented procedures. This English edition of their book lifts an important esoteric acupuncture lineage out of obscurity and presents it to us in complete and accessible form. The holistic approach has also defined Liu’s relentless search for the heart of Chinese medicine during the last three decades, driving his commitment to become the promoter of a diverse spectrum of healing traditions that exemplify the classical standards of Chinese medicine.

The Systematic Classic of Acupuncture & Moxibustion Mi Huangfu 1994
The first clinical textbook of acumoxa therapy dating from the third century - and one of the four great Chinese acupuncture classics - this book is so authoritative that it has provided the framework and standard for all subsequent acupuncture textbooks in China. It contains all the most important passages of the Su Wen and Ling Shu, collated, edited, and arranged according to topic.

A Psychological Analysis of the Delusion Rubrics Liz Lalor 2016-04-06
An invaluable guide for homeopaths and students of homeopathy! Renowned homeopathic counsellor and author, Liz Lalor lectures and writes on the symbiotic relationship between mental and emotional disturbance, and physical pathology. "A Psychological Analysis of the Delusion Rubrics" is an extensive Materia medica adaption of her second book "Homeopathic Psychiatry." In its original form, "Homeopathic Psychiatry" combined homeopathic rubric-repertorisation and traditional counselling techniques to create an invaluable case taking manual. "A Psychological Analysis
of the Delusion Rubrics” expands on this with a revised introduction, new Denial chapter and extended Materia medica to address the narrative behind the physical pathology. Homeopathic analysis of disease concentrates on unearthing the peculiar within the patient's story of their life. In this fresh adaptation, Lalor focuses on the denial process of the patient as they negotiate illness. The peculiar in the patient's narrative is the essence of the understanding of the use and meaning of the Delusion rubrics in case analysis. This book is an invaluable guide, both for homeopaths and students of homeopathy, to fully understand these previously misunderstood and underutilized rubrics in our repertory. "Liz Lalor's book explores humanness within remedies and reflects the remedy back to the psychodynamic delusion. It makes a difference in understanding my client's needs with incorporating Elizabeth Kubler Ross's 5 stages of grief and guides me in the right direction of support. A wonderful desktop companion for my device and clinic desk." Sally Bevan, Homeopath "My entire understanding of delusion rubrics, how to decipher them, and subsequently how to apply them to my case-taking, changed considerably for the better once I had read this very insightful book. Liz's experience with psychotherapy, coupled with her deep understanding of remedies and their psychological profiles, has enabled her to author a book of great significance and profound assistance to the practising homeopath. I highly recommend this book to anyone who wants to more effectively understand the delusion rubrics, what they really mean and how to apply them in case analysis." Carolyn Graham, Noosa Homoeopathic Clinic

Nicholas Culpeper Olav Thulesius 1992-08-25 'Olav Thulesius sets out to resurrect the sullied reputation of one of the most prolific writers of medical works during the Interregnum. - Thulesius has given us a welcome beginning of a study of a fascinating and neglected figure who made serious contributions to mid-seventeenth-century medicine while always living on the fringes of the established and licensed medical community.' - Martha Baldwin, Journal of the History or Medicine

Was Nicholas Culpeper (1616-54) the father of English herbal medicine or a quacksalver and charlatan astrologer? This first modern biography shows a more complex picture. For example during the Civil War the Puritan Culpeper was wounded while fighting on the Parliamentarian side, as a physician of the poor, he had a burning desire to explain the secrets of medicine to ordinary people, He was not only the author of the famous herbal The English Physician but he also wrote the first book on midwifery and childcare and translated The London Pharmacopoeia.

Medicinal Orchids of Asia Eng Soon Teoh 2016-08-30 This unique book brings together a wealth of data on the botanical, ethno-medicinal and pharmacological aspects of over 500 species of Asian medicinal orchids. It starts off by explaining the role and limitations of complimentary and herbal medicines, and how traditional Asian medicine differs from Western, “scientific” medicine. The different Asian medical traditions are described, as well as their modes of preparing herbal remedies. The core of the book presents individual medicinal orchid species arranged by genera. Each species is identified by its official botanical name, synonyms, and local names. Its distribution, habitat and flowering season, uses and pharmacology are described.
An overview sums up the research findings on all species within each genus. Clinical observations are discussed whenever available, and possible therapeutic applications are highlighted. The book closes with chapters on the conservation of medicinal orchids and on the role of randomized clinical trials.

**The Sumerians** Samuel Noah Kramer 2010-09-17 The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology

"An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal

**Yáng Jì Zhōu's the Great Compendium of Acupuncture and Moxibustion** Jizhou Yang 2010 "The Great Compendium of Acupuncture and Moxibustion" by Yang Ji Zhou is an encyclopedic Ming dynasty work on Acupuncture and Moxibustion. The text covers the details of using various point categories and the confluence points of the eight extraordinary vessels.

**Traditional Medicine in Asia** Ranjit Roy Chaudhury 2002 This unique book provides a comprehensive picture of the vivid kaleidoscope of traditional medicine in Asia presented by 34 eminent authors from 15 countries belonging to the different systems like Ayurveda and Chinese Traditional Medicine. Important emerging areas such as harmonization of the traditional systems with modern medicine and the growing role of these systems in the health care structure of countries are also dealt with. Legislation and regulation of these systems and practitioners, an area of growing concern, the need for good preclinical toxicology studies and scientific clinical evaluation of the products and medicinal plants used for therapy are exhaustingly dealt with. The vital issue of protection of traditional systems of medicine and patenting of medicinal plants is discussed in detail. The book is replete with suggestions, and ideas aimed at making traditional systems more effectively, and more widely used for health care. The book also covers the prevailing situation regarding the use and other aspects of traditional medicine in the 10 Member countries of the South-East Asia Region of the World Health Organization.
