Forrester's 2009 Executive Survey (2009-11-01) In the 2009 Executive Survey we collected data from more than 1,000 executives globally to understand the key issues confronting senior executives.

Executive Survey 2009 (2009-10-29) In this Executive Survey we asked 1,300 technology and business leaders about their strategies, priorities, and challenges. We uncovered a number of interesting insights into the way technology leaders are thinking about and preparing for the future:

- A majority of respondents cited emerging technologies as a top priority for 2009.
- Technology leaders are planning for a more sustainable future, with a focus on reducing energy consumption and costs.
- Collaboration and communication are key drivers for success in 2009.
- Cloud computing and social networking are gaining traction as important technologies.

school graduate to anyone who passes it. GED recipients currently account for 12 percent of all high school credentials awarded in the United States. This is a sad truth. It belies the growing understanding that in recent decades, a high school credential is not enough. A new body of evidence suggests that high school graduates who do not enroll in college, high school graduates vastly outperform GED recipients in terms of economic success and educational achievements. The authors show that the differences in success between GED recipients and high school graduates are driven by character skills. Achievement tests like the GED do not adequately capture character skills like conscientiousness, perseverance, social skills, and curiosity. They can be measured, and they can be taught. Using the GED as a case study, the authors explore what achievement tests miss and show the dangers of an educational system based on them. They call for a return to an emphasis on character in our schools, our systems of accountability, and our national dialogue.

The Search for Community George Melnyk 1985 Co-ops in capitalist and communist nations are assessed for strengths and weaknesses as well as for their organization in response to crises, globalization, and increasing competition. Restructuring processes take place and part of the workforce is forced to find other employment. This book explores and explains employment security systems with a specific focus on job-to-job transitions for redundant employees in four European countries: Sweden, the United Kingdom, Austria, and Spain. In addition, it addresses possible lessons the Netherlands can learn from these foreign job-to-job arrangements. This multidisciplinary book will be of great interest to members of the general public who may be affected by job losses, as well as to individuals in the fields of labor market, social security, industrial relations, labor law, economics, and sociology.

The Dictionary of Real Estate Appraisal 2002 This reference book defines hundreds of terms related to buildings, properties, markets, regulations, and appraisal. Specialized sections cover property types, business valuation, international valuation, real estate organizations and professional designations, legal and regulatory aspects, uniform standards, information technology, measures and conversions, and architecture and construction. The architecture and construction section is heavily illustrated with black-and-white photographs and diagrams. Annotation copyrighted by Book News, Inc., Portland, OR.

ResilienceInvestigations (2010-2013) Anima Svit 2014-08-31 Resilience means the ability to function successfully under challenging circumstances and involves the human aspects of police professionalism. How do police personnel continue to do their work under mentally and physically stressful circumstances, and what do they need in order to recover properly? What support can be provided for police personnel in order to ensure that they can continue to contribute to a fairer and safer society - a society in which tensions and stress are increasing, producing only a negative impact on staff and their organization? This edited volume contains findings from fourteen research projects within the ESRC’s Future of Work Programme. The research examines the notion of employment flexibility and the effects of work and family life on police personnel’s well-being, and employees and the gender divisions in work and family life call into question the feasibility of achieving the Government’s aim of work-life balance for everyone.

Aspire High Russell J. Quigala 2016-10-21 The ideal school is closer than you think. This high school of dreams is a dynamic place that promotes aspirations and meaningful learning—and each aspect of its success exists in a school today, drawn from research, observations, focus groups, and interviews. Whether you’re a policymaker or district leader who can build from the ground up or an educator aiming for incremental change, you’ll find your next steps, including: A whole new way to work with all stakeholders Research and action for best practices, from physical layout to curriculum Principles for designing practices that encourage student aspirations Messages from thought leaders inside and outside the field of education

The Myth of Equality and Achievement Tests shows that achievement tests like the GED fail to measure important life skills. James J. Heckman, John Eric Humphries, Tim Kautz, and a group of scholars offer an in-depth exploration of how the GED and other achievement tests have contributed to the underachievement and elevated dropout rates among youth. The authors argue that the differences in success between GED recipients and high school graduates are driven by character skills. Achievement tests like the GED do not adequately capture character skills like conscientiousness, perseverance, social skills, and curiosity.

Each chapter provides detailed instructions for conducting a procedure, describes what difficulties to expect, and presents strategies for overcoming them. Sample dialogues between clients and therapists, annotated by the authors, further illuminate the treatment process. The book concludes with a chapter that both addresses the common mistakes made when implementing CRA, and emphasizes the flexibility and benefits of this total treatment plan. This book is an invaluable resource for a wide range of practitioners including psychologists, psychiatrists, substance abuse counselors, and social workers.
