investing additional funding in building the capacity and linkages that enable innovative learning opportunities to flourish.

Technology and broadcasting are seen as crucial in transforming the way people learn: 65 per cent of all households now have an internet connection and 90 percent of the population has at least one digital television. Government will act as a catalyst, workplace. The Government's proposals to foster and encourage informal adult learning. Informal adult learning is part-time, non-vocational learning where the primary purpose is not to gain a qualification but learning for its intrinsic value. People participate for enjoyment and are driven by their desire for personal fulfillment or intellectual, creative and physical stimulation. Activities cover a huge range, from dance classes and book clubs, visits to museums, galleries and historic properties, online research, volunteer projects. Such activity contributes to the health and well-being of communities by building the confidence and resilience of the individuals involved, developing social relationships, and acting as a stepping stone to further learning and skill development. The Government will establish a clear identity for informal learning and promote four initiatives: a Learning Pledge; a Festival of Learning; an Open Space Movement and a Transformation Fund of £20 million. Partner organisations from the private and public sector will be invited to contribute to the strategy.

Increased access to informal adult learning will be addressed through: widening learning opportunities for older people; reaching out to the disadvantaged; developing a package of support for community learning champions; increasing availability of informal working in the workplace. Technology and broadcasting are seen as crucial in transforming the way people learn: 65 per cent of all households now have an internet connection and 90 percent of the population has at least one digital television. Use Structural Design Patterns and find out how objects and classes interact to build larger applications. Focus on the interaction between objects with the command and observer patterns. Improve the productivity and code base of your application using Python design patterns. In Detail: With the increasing focus on optimized software architecture and design, it is important that software architects think about optimizations in object creation, code structure, and interaction between objects at the architecture or design level. This makes sure that the cost of software maintenance is low and code can be easily reused or is adaptable to change. The key to this is reusability and low maintenance in design patterns. Building on the success of the previous edition, Learning Python Design Patterns, Second Edition will help you implement real-world scenarios with Python's latest release, Python v3.5. We start by introducing design patterns from the Python perspective. As you progress through the book, you will learn about Singleton patterns, Factory patterns, and Facade patterns in detail. After this, we will look at how to control object access with proxy patterns. It also covers observer patterns, command patterns, and compound patterns. By the end of the book, you will have enhanced your professional abilities in software architecture, design, and development. Style and Approach: This is an easy-to-follow guide to design patterns with hands-on examples of real-world scenarios and their implementation in Python v3.5. This book fulfils a growing need by providing a synthesised assessment of the use of development research in education. It looks at four main elements: background information including origins, definitions of development research, description of applications and benefits and risks associated with studies of this kind how the approach can serve the design of learning environments and educational technology quality assurance - how to safeguard academic rigor while conducting design and development studies a synthesis and overview of the topic along with relevant reflections.

ICEMSS 2018 - Poppy Febriana 2019-03-01 "New media and development of gender roles: law, social, and economic perspective." This theme was raised as an effort to observe the development of new technology that has greatly affected people’s lives. Formerly to seek information, people can get it through conventional radio media, newspapers and television. But now only use the smartphone we can get very much information that can be obtained by accessing the online media portal or sharing and socializing through social media. For decades it has been stated that the media has the power to shape public opinion. Media not only can form a “worldview” of society, but
also able to create awareness and individual belief in reality; a reality that has been defined by the media. Media has a powerful and direct effect to the audience (market). Including how then the media formed an opinion in the community about gender roles through the content provided by the new media. Of course it will be interesting to study media related to the law, social, and economic perspective.

**Islam and Muslim Societies** - 2019-04 Islam is more than a religion in the strict theological sense. If we confine ourselves to doctrinal normativity and Islamic law to analyse what Muslims motivate and how they build religious landscapes and life worlds, we seriously narrow down our understanding of Islam. Islamic society is a universal society, found at every place, in East and West, in south and north, and found at all time. It was not only found at the time of the Prophet, but also before his time, and at the time of other Messengers from Adam to Jesus (peace be upon them all), and after their time. Koranic teachings promote an ascetic ethic of self-control that bears on virtually all aspects of everyday activity. For Muslims, faith has not merely been a matter of private life and a personal relation with God. It has had pervasive social consequences. The Holy Qur’an and the traditions of the Prophet are concerned about Muslim and Islamic society. In many ways these holy books focuses on the importance of Islamic society. Because Allah and his prophet believes that Muslims Ummah are the best among all Adam’s generation. Consequently, Islamic religion takes them out from the darkness into the light in order to achieve happiness, felicity in this world and the Hereafter. This book Islam and Muslim Societies consists of studies dealing with political, economic, legal, and social policies that affect every facet of the social life of Muslims. This book is aimed at bridging the gap between the textual and contextual approaches to Islamic Studies; and solving the dichotomy between ‘orthodox’ and ‘heterodox’ Islam. It contains a selection of studies written by scholars and authors dealing with Islam and Muslim societies as its central focus of academic inquiry and to encourage comprehensive consideration of its many facets; to provide an opportunity for the study of Islam and Muslim societies in their global context; to encourage interdisciplinary studies of the Islamic world that are cross-national and comparative; to promote the diffusion, exchange and discussion of research findings; and to encourage interaction among academics from various traditions of learning.

The Effect of School Type on Academic Achievement—David Newhouse 2005 “Using data from Indonesia, Newhouse and Beegle to evaluate the impact of school type on academic achievement of junior secondary school students (grades 7-9). Students that graduate from public junior secondary schools, controlling for a variety of other characteristics, score 0.15 to 0.3 standard deviations higher on the national exit exam than comparable privately schooled peers. This finding is robust to OLS, fixed-effects, and instrumental variable estimation strategies. Students attending Muslim private schools, including Madrassahs, fare no worse on average than students attending secular private schools. The results provide indirect evidence that higher quality inputs at public junior secondary schools promote higher test scores.”—Cover verso.

The Action Research Planner—Stephen Kemmis 2013-11-12 A fully-updated and reworked version of the classic book by Stephen Kemmis and Robin McTaggart, now joined by Rhonda Nixon, The Action Research Planner is a detailed guide to developing and conducting a critical participatory action research project. The authors outline new views on ‘participation’ (based on Jürgen Habermas’s notion of a ‘public sphere’), ‘practice’ (as shaped by practice architectures), and ‘research’ (as research within practice traditions). They provide five extended examples of critical participatory action research studies. The book includes a range of resources for people planning a critical participatory action research initiative, providing guidance on how to establish an action research group and identify a shared concern, research ethics, principles of procedure for action researchers, protocols for collaborative work, keeping a journal, gathering evidence, reporting, and choosing academic partners. Unlike earlier editions, The Action Research Planner focuses specifically on critical participatory action research, which occupies a particular (critical) niche in the action research ‘family’. The Action Research Planner is an essential guide to planning and undertaking this type of research.
