Recent years have witnessed an explosive growth in the literature published about Japan. Yet the more that is written about Japan and Japanese culture, the more mysterious it becomes. As well as exploring new developments in the study of Japanese culture, this book depicts the unique characteristics of the contemporary Japanese culture.

The Origins of Self explores the role that selfhood plays in defining human society, and in understanding the development of selfhood. The book examines the various ways in which selfhood has been understood, and the ways in which the development of selfhood has been influenced by cultural and historical factors.

Jane K. Cowan 2001-11-29

Do people everywhere have the same, or even compatible, ideas about multiculturalism, diversity, or rights? The authors of this book move beyond the traditional terms of the universalism versus cultural relativism debate.

John W. Burton 2001 To appreciate the human body is to acknowledge the various ways in which it has become a cultural artifact rather than a purely natural phenomenon."--BOOK JACKET.

Peter Wade 2002-06-20

Integrating material from the history of science, science studies, and anthropological studies of technology, Wade (social anthropology, U. of Manchester, UK) explores the social and cultural contexts in which new reproductive technologies are being created and used, and examines the ways in which they are perceived and used by different groups.

Ladislav Holy 1996-10-20

Explores new developments in kinship-studies in anthropology -- including the impact of new reproductive technologies and changing conceptualizations of gender and kinship.

A decade after the approval of the UNESCO 2003 Convention for the Safeguarding of Intangible Cultural Heritage (ICH), the concept has gained wide acceptance at the local, national and international levels. Communities are recognizing and celebrating their Intangible Heritage, and developing efforts to protect the construction of national inventories, and anthropologists and professionals from different disciplines are forming a new field of study. The two chapters of this book include the main points of view that have been presented in the field of ICH.

One of their particuar concerns is to reveal how insights from 'traditional' cultures illustrate the problems for the forest; how insights from the 'modern' world are used to forestall the problems for the forest. They also show how the subjects studied in the text are related to those who study 'other' cultures ultimately learn about themselves. This is the relevance of social anthropology today.
