Invisible Cities (1972) is the most important work in the oeuvre of Italo Calvino. This is the first book to provide a comprehensive account of co-operative inquiry: a way of doing research with people where the topics of concern and the researchers are integrated. Co-operative inquiry is distinctive and wide-ranging form of participatory research in which people use the full range of their capacities and are able to take initiatives, to organize and manage their own actions. Participation in the research process is a primary goal. Co-operative inquiry is an approach that facilitates participation in personal and social change. It enables people to explore their own ideas and experiences in a way that is meaningful to them. It also helps them to develop new ways of understanding their situation and to take action to improve it. The book presents the perspectives of researchers who are engaged in co-operative inquiry. It offers practical advice on how to conduct co-operative inquiry projects, and it provides examples of the types of research that can be carried out using this approach. It is an essential resource for anyone interested in participatory research and social change.

Robert Blackwood 2021-10-17 This innovative collection explores critical issues in understanding multilingualism as a defining dimension of

identity creation and negotiation in contemporary social life. Reinforcing interdisciplinary conversations on these themes, each chapter is co-authored by two different

researchers, often those who have not written together before. The combined effect is a volume showcasing unique and dynamic perspectives on such topics as rethinking of

language policy, testing of language rights, language pedagogy, meaning-making, and activism in the linguistic landscape. The book explores multilingualism through the

lenses of spaces and policies as embodied in Elizabeth Lanza's body of work in the field, with a focus on the latest research on linguistic landscapes in diverse settings. Taken

together, the book offers a window into better understanding issues around processes of change in and of languages and societies. This groundbreaking volume will be

of particular interest to students and scholars in multilingualism, applied linguistics, and sociolinguistics.
