Globalization Thomas Hylland Eriksen 2014-06-32 The first time in human history, the vast majority of the world's population is connected through trade, travel, production, media, and politics. Ours is an era of ubiquitous mass communication, economic outsourcing, migration, and imported cultural goods. At the same time, people everywhere are concerned to keep their identities rooted and sense of place in the face of momentous change. This new edition of Thomas Hylland Eriksen's widely acclaimed book provides a fresh, revised and updated account of globalization. It is an essential resource for anyone wishing to understand the fundamental processes underlying the contemporary world and the consequences these have for all of us.

Mobility of Labour from New EU States to the Nordic Region Line Eldring 2008-06-30 This book is the first to explore access under a CC BY NC ND 4.0 license. This open access book discusses how Norwegian shipping companies played a crucial role in global shipping markets in the 20th century, at times transporting more than ten per cent of world seaborne trade. Chapters explore how Norway managed to remain competitive, despite being a high-labour cost country in an industry with a global labour market. In the long run, the combination of entrepreneurship and a focus on the core business contributed to Norwegian maritime enterprises remaining competitive. The book presents an original perspective on the growth of the oil industry in Norway, and its implications for the shipping sector. The growing importance of offshore petroleum exploration in the North Sea from the 1970s was both a threat and an opportunity to the shipping industry. By adapting both business strategies and the political regime to the new circumstances, the Norwegian shipping sector managed to maintain a leading position internationally.

Migrants and Markets. Holger Kolb 2008 Over the course of their interaction, economics and migration research have treated each other with mutual influence. When migration research attempted to overstretch its bounds, economics reduced its analytical scope to those areas that originally seemed to belong to the genuine economic sphere. This volume considers eleven case studies that aim to overcome the artificial barrier between the two disciplines by applying the economic method to migratory phenomena, utilizing economic theories in order to explain migratory patterns, and regarding the structure and development of markets as crucial to the shaping of population stocks and the flow of migrants.

A Literary Anthropology of Migration and Belonging Cicilie Fagerlid 2020-01-30 This collection pushes migration and "the minor" to the fore of literary anthropology. What happens when authors who thematize their "minority" background articulate notions of belonging, self, and society in literature? The contributors use "interface ethnography" and "fieldwork on foot" to analyze a broad selection of literature and processes of dialogic engagement. The chapters discuss German-speaking Herta Müller's perpetual minority status in Romania; Bengali-Scottish Bashabi Fraser and the potentiality of poetry; avant-garde pastoralism and "heritagization" in Puglia, Italy; the self-representation of European Muslims post 9/11 in Zechar Shaker's acclaimed Norwegian novel; the autobiographical narratives of Lovelie Renil Brenna and the artist collective Queenend in Norway; the "immigrant" as a permanent guest in Spanish-language children's literature; and Slovenian roots-searching in Argentina. This anthology examines the generative and transformative potentials of storytelling, while illustrating that literary anthropology is well equipped to examine the multiple contexts that literature engages. Chapter 4 of this book is available open access under a CC 4.0 license at link.springer.com.

(NOM) The Academic Profession in Europe: New Tasks and New Challenges Barbara M. Kehm 2012-08-21 This book is the first of several with the results of a collaborative European project supported by the European Science Foundation on changes in the academic profession in Europe (EUROAC). It provides a short description of the ESI EUHESIC programme and the particular forms of international collaborative research projects which are funded under the umbrella of this programme. It then outlines the EURACO project. This project has chosen three foci (governmentalisation, professionalisation, academic careers) to analyse changes in the work of the academic profession. The first results in the form of in-depth literature reviews constitute the content of the book. These eight literature reviews cover the state of the art of existing research features the various dimensions of the overall theme. A particular emphasis is put on factors leading to changes in the work tasks of the academic profession in Europe and how the academic profession is coping with these new challenges. Thus, the book provides a state of the art account of existing research about the following themes: main results of previous studies on the academic profession; the academic profession and its interaction with new higher education professionals; professional identities in higher education; extending work tasks: civic mission and sustainable development; academic careers in academic markets; the changing role of academics in the face of rising managerialisation; the influence of quality assurance, governance, and relevance on the satisfaction of the academic profession. can inform future developments to improve foreign language teaching. Through chronological analysis of French textbooks in the United States, this book explores the representations of Canada and Quebec in French beginner textbooks produced from 1960 to 2010. Chapelle couples a large collection of 65 textbooks with a sociolinguistic qualitative analysis of the genres, language and images that communicate Quebec’s cultural narrative to learners. Findings about the amount and type of content are presented by decade to track the trends in foreign language teaching and changes in Quebec’s representation. Particular attention is given to how language policies is presented to students through text and images. This book will be of interest to scholars of Canadian studies. Quebec Studies and Second Language Acquisition, as well as foreign language materials developers. The indigenous identity of the South Saami Hixon Hermansson 2019-02-01 This open access book is a novel contribution in two ways: it is a multi- disciplinary examination of the indigenous South Saami people in Fennoscandia, a social and cultural group that often is overlooked as it is a minority within the Saami minority. Besides historical material such as archeological evidence, 20th century newspapers, and postcard motes as well as current sources such as anglings land-right trials and recent works of historiography, the articles highlight the culture and living conditions of this indigenous group, mapping the negotiations of different identities through the interaction of Saami and non-Saami people through the ages. By illuminating this underresearched field, the volume also enriches the more general debate on global indigenous history, and sheds light on the construction of a Scandinavian identity and the limits of the welfare state and the myth of heterogeneity and equality.

Migration Control and Access to Welfare Marry-Anne Karlsten 2021-06-22 The Open Access version of this book, available at www.taylorandfrancis.com, has been made available under a Creative Commons Attribution-No Commercial-No Derivatives 4.0 license. Over the past decades, European states have increasingly limited irregular migrants’ access to welfare services as a tool for migration control. Still, irregular migrants tend to have access to certain basic services, although frequently of a subordinate, arbitrary, and unstable kind. Drawing on in-depth ethnographic fieldwork conducted in Norway, this book sheds light on ambiguities in the state’s response to irregular migration that simultaneously cut through law, policy, and practice. Carefully examining the complex interplay between the geopolitical management of territory and the biopolitical management of populations, the book argues that irregularised migrants should be understood as precariously included in the welfare state rather than simply excluded. The notion of precarious inclusion highlights the insecure and unpredictable nature of the inclusive practises, underscoring how limited access to welfare does not necessarily contradict restrictive migration policies. Taking the situated encounters between irregularised migrants and service providers as its starting point for exploring broader questions of state sovereignty, biopolitics, and borders, Migration Control and Access to Welfare offers insightful analyses of the role of life, territory, and temporality in contemporary politics. As such, it will appeal to scholars of migration and border studies, gender research, social anthropology, geography, and sociology.

Urban Contact Dialects and Language Change Paul Kerswill 2022-03-31 This volume provides a systematic comparative treatment of urban contact dialects in the Global North and South, examining the emergence and development of these dialects in major cities in sub-Saharan Africa and North-Western Europe. The book’s focus on contemporary urban settings sheds light on the new language practices and mixed ways of speaking resulting from large-scale migration and the intense contact that occurs between new and existing languages and dialects in these contexts. In comparing these new patterns of language variation and change between cities in both Africa and Europe, the volume affords us a unique opportunity to examine commmonalities in linguistic phenomena as well as sociolinguistic differences in societally multilingual settings and settings dominated by a strong monolingual habitus. These comparisons are reinforced by a consistent chapter structure, with each chapter presenting the linguistic and social context of the region, information on available data (including corpora), sociolinguistic and structural findings, a discussion of the status of the urban contact dialect, and its stability over time. The discussion in the book is further enriched by short commentaries from researchers contributing different theoretical and geographical perspectives. Taken as a whole, the book offers new insights into migration-based linguistic diversity and patterns of language variation and change, making this ideal reading for students and scholars in general linguistics and language structure, sociolinguistics, creole studies, diachronic linguistics, language acquisition, anthropological linguistics, language education and discourse analysis.

This thorough introduction to modern-day Norway and Norwegian culture shows the diversity and dynamic nature of Norwegian society. Based on both historical material such as archaeological evidence, 20th century newspapers, and postcard motives as well as current sources such as ongoing land-right trials and recent works of historiography, the articles highlight the culture and living conditions of this indigenous group, mapping the negotiations of different identities through the interaction of Saami and non-Saami people through the ages. By illuminating this underresearched field, the volume also enriches the more general debate on global indigenous history, and sheds light on the construction of a Scandinavian identity and the limits of the welfare state and the myth of heterogeneity and equality.
